

Roundwood framing course

The Woodyard, Duchy Home Farm

Within the 5 days you'll practice cutting all the joints you'll need to build a roundwood timber frame.

No previous experience is necessary. Some people on our course want to build houses others sheds or garden structures. These techniques can be applied to a range of green wood projects.

The course is held at our lovely wood yard, the place where all our building projects start. Amazing organic meals prepared fresh on site by our fabulous chef, Katherine. Camping is in the woodland or fields behind the yard.

I look forward to seeing you soon.
Adrian - lead craftsman
